PROJECTS

BLOGGING PLATFORM

Flask, HTML, Jinja2, MySQL   **Team size: 2**

"The Valiant Intellect" is a full-stack web application, a simple and elegant blogging platform built using the Flask web framework. The primary objective of this project was to create a user-friendly platform that allows a blogger to publish their articles. The platform has functionalities like user login, dashboard, blog post creation, editing and deletion, contact form, and an about page.
Used Flask for building the back-end of the application, Jinja2 for rendering dynamic HTML templates, SQLAlchemy library, to interact with the database and define database models, and Flask-Mail for handling email functionality.

EMPLOYEE MANAGEMENT SYSTEM

Java, Swing, JDBC, AWT, MySQL

Designed a system to meet the needs such as adding and deleting employee details, viewing and printing employee data, and updating employee information.
It's an easy to use interface that will let the administrator intereact with the system.

NEWS WEBSITE

HTML, CSS, JavaScript

Developed a dynamic news website that fetches real-time news, enabling easy navigation through topics and search options, while also displaying current weather conditions.
